|  | E-Mail Datenschutz                 | Achtung! Es wurde mindestens eine E-Mail Adresse im Klartext auf Ihrer Webseite gefunden. Benutzen Sie <a href="#">dieses kostenlose Werkzeug</a> um E-Mail Adressen vor SPAM zu schützen.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|  | Veraltetes HTML                    | Sehr gut! Sie verwenden aktuelle HTML Tags in Ihrem Webseitenquelltext.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|  | Tipps zur Webseitengeschwindigkeit | <div><div></div> Sehr gut, denn Ihre Webseite benutzt keine verschachtelten Tabellen.</div> <div><div></div> Schlecht, denn es wurden CSS-Angaben in HTML-Elementen entdeckt. Diese Angaben sollten in ein entsprechendes CSS-Stylesheet verlagert werden.</div> <div><div></div> Nicht so gut, denn Ihre Webseite enthält sehr viele CSS-Dateien (mehr als 4).</div> <div><div></div> Perfekt, denn Ihre Webseite enthält nur wenig Javascript-Dateien.</div> <div><div></div> Ihre Webseite nutzt die Vorteile von gzip nicht.</div> |

## Optimierung

Webanalyse erlaubt die Quantifizierung der Besucherinteraktionen mit Ihrer Seite. Insofern sollte zumindest ein Analysetool installiert werden. Um die Befunde abzusichern, empfiehlt sich das parallele Verwenden eines zweiten Tools.
