- [H5] Gingko biloba is a popular herb that has been used for centuries in traditional medicine to enhance cognitive function. It contains powerful antioxidants that help protect brain cells from damage caused by free radicals. Gingko biloba extract is believed to improve memory, focus, and overall cognitive performance by increasing blood flow to the brain and enhancing the delivery of oxygen and nutrients to brain cells.
- [H5] Bacopa monnieri, also known as Brahmi, is an herb native to India that has been used for thousands of years to support brain health. It contains compounds called bacosides, which have been shown to improve memory, learning, and cognitive function. Bacopa monnieri extract is believed to work by enhancing the production of neurotransmitters in the brain, improving communication between brain cells, and reducing inflammation.
- [H5] Omega-3 fatty acids are essential nutrients that play a crucial role in brain health. They are found in high concentrations in fatty fish like salmon, mackerel, and sardines, as well as in flaxseeds, chia seeds, and walnuts. Omega-3 fatty acids are important for maintaining the structure and function of brain cell membranes, promoting the growth and development of brain cells, and reducing inflammation in the brain. Research suggests that omega-3 fatty acids may help improve memory, mood, and cognitive function, and may even reduce the risk of age-related cognitive decline and neurodegenerative diseases like Alzheimer's.
- [H5] The B vitamins are a group of water-soluble vitamins that

## SEO Sisältö

play essential roles in brain function and overall mental health. They include vitamins B1 (thiamine), B2 (riboflavin), B3 (niacin), B5 (pantothenic acid), B6 (pyridoxine), B7 (biotin), B9 (folate), and B12 (cobalamin). These vitamins are involved in various processes in the brain, including the production of neurotransmitters, the synthesis of DNA and RNA, and the metabolism of energy. A deficiency in B vitamins can lead to symptoms such as fatigue, irritability, memory problems, and depression. Supplementing with a B-complex vitamin may help support brain health and improve cognitive function, especially in individuals with poor nutrition or certain medical conditions that affect nutrient absorption.

- [H5] Lion's mane mushroom, scientifically known as *Herichium erinaceus*, is a unique fungus with potential cognitive benefits. It contains bioactive compounds called hericenones and erinacines, which have been shown to stimulate the growth and repair of nerve cells in the brain. Lion's mane mushroom extract is believed to enhance cognitive function by promoting the production of nerve growth factor (NGF), a protein that plays a crucial role in the growth, survival, and maintenance of neurons. Research suggests that lion's mane mushroom may improve memory, concentration, and overall cognitive performance, making it a promising natural supplement for brain health.
- [H5] *Rhodiola rosea*, also known as golden root or arctic root, is an adaptogenic herb that has been used for centuries in traditional medicine to help the body adapt to stress and improve mental performance. It contains bioactive compounds called rosavins and salidroside, which have been shown to increase the brain's resistance to stress, improve mood, and enhance cognitive function. *Rhodiola rosea* extract is believed to work by modulating the levels of neurotransmitters like serotonin and dopamine in the brain, as well as by reducing the activity of stress hormones like cortisol. Research suggests that *rhodiola rosea* may help improve focus, attention, and mental clarity, especially during periods of stress or fatigue.
- [H5] Phosphatidylserine is a phospholipid compound that is found in high concentrations in cell membranes, particularly in brain cells. It plays a crucial role in maintaining the structure and function of cell membranes, facilitating communication between brain cells, and regulating the flow of nutrients and waste products in and out of cells. Phosphatidylserine is believed to support cognitive function by enhancing neurotransmitter activity, promoting the growth and repair of brain cells, and protecting against oxidative stress and inflammation. Research suggests that phosphatidylserine supplementation may help improve memory, attention, and cognitive performance, particularly in older adults experiencing age-related cognitive decline or individuals with conditions like Alzheimer's disease.
- [H5] L-theanine is an amino acid found primarily in tea leaves, particularly in green tea. It has been studied for its potential cognitive and mood-enhancing effects. L-theanine is believed to work by increasing the production of neurotransmitters like serotonin and dopamine in the brain, which are associated with feelings of relaxation, focus, and well-being. Research suggests
